

**Production for the Zen Rail ceased in 2000.** Zen rails typically mount at the point where passenger pegs bolt to the sub-frame. Modern fitments may work if spacing of these bolts is similar and bends closely match. Construction is solid stainless steel, so drilling an additional mounting hole into the Zen Rail is an effective means to modify the product to fit your motorcycle.

**Honda**

CBR 600 F4i	ZHNKCB01
RC 51 / VTR1000SP	ZHNKR01
VFR	ZHNKVF01
929 high	ZHNK2900-HI (ZenRails fit over stock turn signals)
929 low	ZHNK2900-LO
